# 1. INTRODUCTION

## 1.1 Project Overview:

In the past, our parents kept tabs on all of their expenses by recording them in a small notebook and adding up the totals on their own. Today, many of our parents still do this to maintain their financial obligations, though some don't give a damn about their outgoing costs. Our expense tracker application will be very useful for financial management because expenses need to be kept track of in both large and small scale industries, including many schools, colleges, marketing firms, departmental stores, etc. This will help them do their jobs better and make people's lives easier.

When using the application's results, they will be able to track their monthly spending and recognise their daily expenses.

## 1.2 Purpose:

Today, when our everyday expenses are rising every day, keeping track of our spending is crucial. Keeping an eye on it is crucial. We may have a balanced financial life and, if kept up properly, considerably greater savings, by keeping track of our expenses.

A person can reduce wasteful spending by maintaining financial balance, and keeping track of daily expenses gives them a clear picture of where their money is going and how to spend it less.

In the end, tracking can help one achieve financial and personal equilibrium, which is crucial for blending into society.

## **2 . LITERATURE SURVEY:**

### **2.1 Existing problem**

Many websites and apps exist that allow users to track their spending by connecting their bank accounts to the app, while some programmes also require manual entry of the expense amount. These apps merely track spending at random, leaving out some of the smaller expenses we incur every day. Since the user's bank information is tied to these existing apps, it is not very safe. We always prefer that the information we provide to banks be very safe and secure.

We must take steps to preserve and resolve these security-related problems, particularly those involving money and costs.

Additionally, the user will benefit from the current system if it immediately lowers costs as we link the financial transactions.

### **2.2 References**

#### **PAPER 1:**

**TITLE:** Expense Tracker : A Smart Approach to Track Everyday Expense

**AUTHOR:** Ms.J. Angelin Blessy, Anant Prakash Singh, Navneet Kumar, Hrithik Gupta

**PUBLICATION YEAR:** 2020

#### **DESCRIPTION:**

The purpose of expense tracker, a daily cost management system that replaces manual paper work with a computerised system that consistently keeps records and makes user-stored data accessible, is to conveniently and effectively track daily expenses.

#### **PAPER 2:**

**TITLE:** Budget Estimator Android Application

**AUTHOR:** Namita Jagtap, Priyanka Joshi, Aditya Kamble

**PUBLICATION YEAR:** 2019

#### **DESCRIPTION:**

This application divides the user's income into the daily expenses that are permitted; if the user exceeds the daily expenses, it deducts the excess from your income and gives you a new daily expense allowance; if the daily expenses are less than the allowance, it adds the difference to your savings.

At the end of the month, a cost tracking programme will produce a report that displays revenue and expenses in different graphs.

### **PAPER 3:**

**TITLE:** Expense Tracker

**AUTHOR:** Atiya Kazi , Praphulla S. Kherade , Raj S. Vilankar , Parag M. Sawant

**PUBLICATION YEAR:** 2021

**DESCRIPTION:**

They are creating the "Expense Tracker" android application. This project is an android app that tracks a user's daily expenses, as the name would imply. It functions similarly to computerised record keeping, which logs user spending. The application records daily information about the user's income and outgoing costs.

### **PAPER 4:**

**TITLE:** Expense Tracker Mobile Application

**AUTHOR:** Angad Manchanda

**PUBLICATION YEAR:** 2012

**DESCRIPTION:**

XpensTrak, the Expense Tracker Mobile Application was developed for iPhone users to keep track of their expenses and determine whether they are spending as per their set budget. Potential users need to input the required data such as the expense amount, merchant, category, and date when the expense was made. Optional data such as sub-category and extra notes about the expense can be entered as well. The application allows users to track their expenses daily, weekly, monthly, and yearly in terms of summary, bar graphs, and pie-charts.

### **PAPER 5:**

**TITLE:** Daily Expense Tracker

**AUTHOR:** Shivam Mehra, Prabhat Parashar

**PUBLICATION YEAR:** 2021

**DESCRIPTION:**

This paper represents a Daily Expense Tracker is a tool that resides on a remote server and is accessible via browsers. As the name suggest Daily Expense Tracker is a web application that allows you to track the daily expense of the user and help them to better manage their resources. It creates a digital record of the income and expense of the user. It input from the user a income, source of this income and the date of earning that income and creates a transaction entry under income category sums to the total amount of income and making real time changes. The various sources of income can be added and thus the distribution of your income is also illustrated by real time functioning charts that will keep updating as per your transactions

### 2.3 Problem Statement Definition:

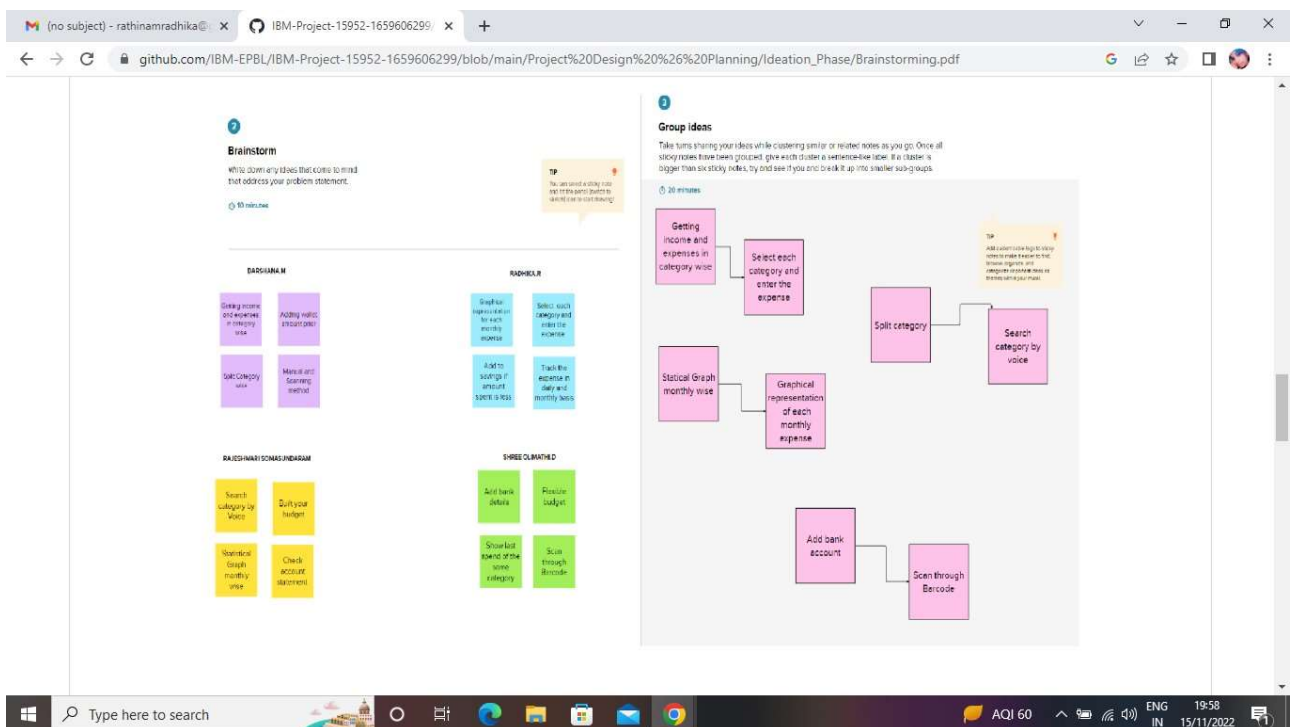

<b>Problem Statement (PS)</b>	<b>I am (Customer)</b>	<b>I'm trying to</b>	<b>But</b>	<b>Because</b>	<b>Which makes me feel</b>
PS-1	an employee	Make a monthly budget..	There are no facilities to set a budget	Can't categorize the various types of expenses	Frustrated
PS-2	A manager	Keep track of my expenses.	Can't categorize the various types of expense	There is no option to organize the various expenses	Uncomfortable.

### Customer Problem Statement:

A well-articulated customer problem statement allows us to find the ideal solution for the challenges our customers face. Throughout the process, you'll also be able to empathize with your customers, which helps you better understand how they perceive your products and services.

### 3.1 Empathy Map Canvas

### 3.3 Proposed Solution

S. No	Parameter	Description
1.	Problem Statement (Problem to be solved)	<p>Earlier, our parents use to track all their expenses by writing down in a small notebook and calculating it on their own. Even still, many of them follow the same to maintain their financial expenses, even some of them don't care of their expenses and spendings. Not only in our homes, expenses are needed to be tracked in many large scale and small scale sectors such as in many schools, colleges, marketing companies, departmental stores, etc. So in order to optimize their work and make people's life easier, our expense tracker application will be much helpful for financial management. The outcome of the application will be much useful for them to acknowledge the daily expenses and track the monthly expenses from their income with a limit to spend. They can easily track and view their expenses with a statistical data. In short, tracking our financial expenses is a great deal, especially in this scenario, so making those tracking easier is the job of this application.</p>

2.	Novelty / Uniqueness	This application tracks your every expenses anywhere and anytime without using the paper work. Just click and enter your expenditure. to avoid data loss, quick settlements and reduce human error. To provide the pie chart or graph lines in this application.
3.	Social Impact / Customer Satisfaction	Using this application one can track their personal expenses and frame a monthly/annual budget. If your expense exceeded than specified limit, the application will show you an alert message in form of a pie chart.
4.	Business Model (Revenue Model)	Business people can use subscription/premium feature of this application to gain revenue..

### 3.4 Problem Solution fit

Define CS, fit into CC	<b>1. CUSTOMER SEGMENT(S)</b> <ul style="list-style-type: none"><li>• Working Individuals</li><li>• Students</li><li>• Budget conscious consumers</li></ul>	<b>6. CUSTOMER CONSTRAINTS</b> <ul style="list-style-type: none"><li>• Internet Access</li><li>• Device (Smartphone) to access the application</li><li>• Data Privacy</li><li>• Cost of existing applications</li><li>• Trust</li></ul>	<b>5. AVAILABLE SOLUTIONS</b> <ul style="list-style-type: none"><li>• Expense Diary or Excel sheet</li></ul> <p>PROS : Have to make a note daily which helps to be constantly aware</p> <p>CONS : Inconvenient, takes a lot of time</p>						
	<b>2. JOBS-TO-BE-DONE / PROBLEMS</b> <ul style="list-style-type: none"><li>• To keep track of money lent or borrowed</li><li>• To keep track of daily transactions</li><li>• Alert when a threshold limit is reached</li></ul>	<b>9. PROBLEM ROOT CAUSE</b> <ul style="list-style-type: none"><li>• Reckless spendings</li><li>• Indecisive about the finances</li><li>• Procrastination</li><li>• Difficult to maintain a note of daily spendings (Traditional methods like diary)</li></ul>	<b>7. BEHAVIOUR</b> <ul style="list-style-type: none"><li>• Make a note of the expenses on a regular basis.</li><li>• Completely reduce spendings or spend all of the savings</li><li>• Make use of online tools to interpret monthly expense patterns</li></ul>						
Identify strong TR & EM	<b>3. TRIGGERS</b> <ul style="list-style-type: none"><li>• Excessive spending</li><li>• No money in case of emergency</li></ul>	<b>10. YOUR SOLUTION</b> <p>Creating an application to manage the expenses of an individual in an efficient and manageable manner, as compared to traditional methods</p>	<b>8. CHANNELS OF BEHAVIOUR</b> <p>ONLINE</p> <p>Maintain excel sheets and use visualizing tools</p>						
	<b>4. EMOTIONS</b> <table><tr><td>BEFORE</td><td>AFTER</td></tr><tr><td>• Anxious</td><td>• Confident</td></tr><tr><td>• Confused</td><td>• Composed</td></tr><tr><td>• Fear</td><td>• Calm</td></tr></table>		BEFORE	AFTER	• Anxious	• Confident	• Confused	• Composed	• Fear
BEFORE	AFTER								
• Anxious	• Confident								
• Confused	• Composed								
• Fear	• Calm								

## 4. REQUIREMENT ANALYSIS

### 4.1 Functional requirement

Following are the functional requirements of the proposed solution.

FR No.	Functional Requirement (Epic)	Sub Requirement (Story / Sub-Task)
FR-1	User Registration	User should Register using their Email.
FR-2	Login	Enter username (Email) and password
FR-3	Select Method	Two methods are provided 1-Manual (Manually Enter the expenses) 2-Bank (Link Bank Account)
FR-4	Manual Method	Manually user can enter the expenses by using voice recognition by simply saying category and amount spent on that also can use Barcode Scanner by using Bill provided while purchasing.
FR-5	Bank Method	In Bank method user have to Enter their Bank details in prior and all the Bank using transactions are detected and tracker accordingly.
FR-6	Expense Tracker	This application should graphically represent the expense in the form of report.
FR-7	Report generation	Graphical representation of report must be generated.
FR-8	Category	This application shall allow users to add categories of their expenses.

## 4.2 Non-Functional requirements

Following are the non-functional requirements of the proposed solution.

FR No.	Non-Functional Requirement	Description
NFR-1	<b>Usability</b>	Helps to keep an accurate record of your income and expenses.
NFR-2	<b>Security</b>	Budget tracking apps are considered very safe from those who commit cyber crimes.
NFR-3	<b>Reliability</b>	Each data record is stored on a well built efficient database schema. There is no risk of data loss
NFR-4	<b>Performance</b>	The types of expense are categories along with an option. Throughput of the system is increased due to light weight database support.
NFR-5	<b>Availability</b>	The application must have a 100% up-time.
NFR-6	<b>Scalability</b>	The ability to appropriately handle increasing demands.

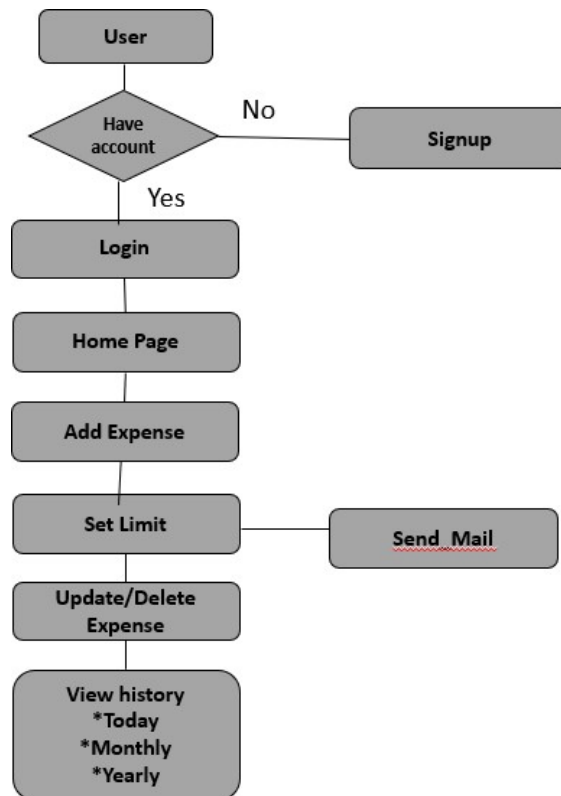

## 5. PROJECT DESIGN

### 5.1 Data flow diagram:

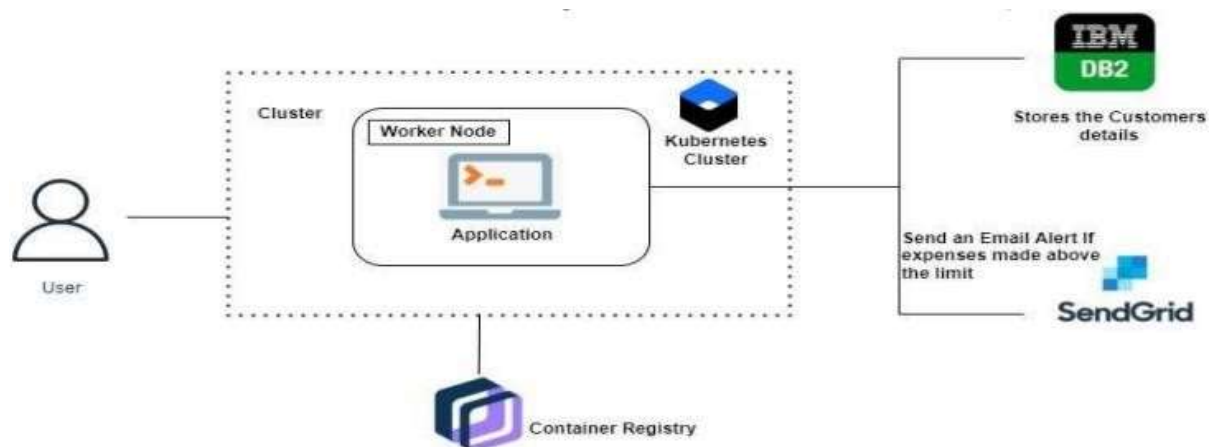

A Data Flow Diagram (DFD) is a traditional visual representation of the information flows within a system. A neat and clear DFD can depict the right amount of the system requirement graphically.

It shows how data enters and leaves the system, what changes the information, and where data is stored.

A Data Flow Diagram (DFD) is a traditional visual representation of the information flows within a system. A neat and clear DFD can depict the right amount of the system requirement graphically. It shows how data enters and leaves the system, what changes the information, and where data is stored.

## 5.2 Solution & Technical Architecture

**Table-1: Components & Technologies**

<b>So</b>	<b>Component</b>	<b>Description</b>	<b>Technology</b>
1.	User Interface	The user can Interact with the application with use of Chatbot	HTML, CSS, JavaScript / Angular Js / React Js etc.
2.	Application Logic-1	The application contains the sign in/sign up where the user will login into the main dashboard	Java / Python
	Application Logic-2	Dashboard contains the fields like Add income, Add Expenses, Save money	IBM Watson STT service
	Application Logic-3	The user will get the expense report in the graph form and also get alerts if the expense limit exceeds.	IBM Watson Assistant, SendGrid
3.	Database	The Income and Expense data are stored in the MySQL database	MySQL, NoSQL, etc
4.	Cloud Database	With use of Database Service on Cloud, the User data are stored in a well secured Manner	IBM DB2, IBM Cloudant etc
5.	File Storage	IBM Block Storage used to store the Financial data of the user	IBM Block Storage or Other Storage Service or Local File system
6.	Infrastructure (Server / Cloud)	Application Deployment on CloudLocal Server Configuration	Local and Cloud Foundry

**Table-2: Application Characteristics:**

<b>S.no</b>	<b>Characteristics</b>	<b>Description</b>	<b>Technology</b>
1.	Open-Source Frameworks	Flask Framework in Python is used to implement this Application	Python-Flask
2.	Security Implementations	This application provides high security to the user Financial data. It can be done by using the Container Registry in IBM cloud.	Container Registry, Kubernetes Cluster

3.	Availability	This application will be available to the user at any part of time	Container Registry, Kubernetes Cluster
4.	Performance	The performance will be high because there will be no network traffics in the application	Kubernetes Cluster

### 5.3 User Stories

Use the below template to list all the user stories for the product.

User Type	Functional Requirement(Epic)	User Story Number	User Story/ Task	Acceptance criteria	Priority	Release
Customer	Registration	USN-1	As a user, I can register for the application by entering my email,password	I can access my account / dashboard	High	
		USN-2	As a user, I will receive confirmation email once I have registered for the application	I can receive confirmation email & click confirm	High	
	Login	USN-3	As a user, I can log into the application by entering email & password	I can access the application	High	
	Dashboard (Budget Setting)	USN-4	As a user ,I can enter my income and expenditure details (Set Budget).	I can view my daily expenses	High	
	Category Selection (Manual, Bank )	USN-5	As a user, I can use Manual method where it has Barcode and Voice Recognition techniques and also I can go with Bank method	I can select according to my convenience	High	
Customer Care Executive		USN-6	As a customer care executive I can solve the log in issues and other issues of the application	I can provide support or solution at any time 24*7	Medium	

Administrator	Application	USN-7	As a administrator I can upgrade or update the application	I can fix the bug which arises for the customers and users of the application	Medium	
---------------	-------------	-------	--	---	--------	--

## 6. PROJECT PLANNING AND SCHEDULING

### Project Tracker, Velocity & Burn down Chart

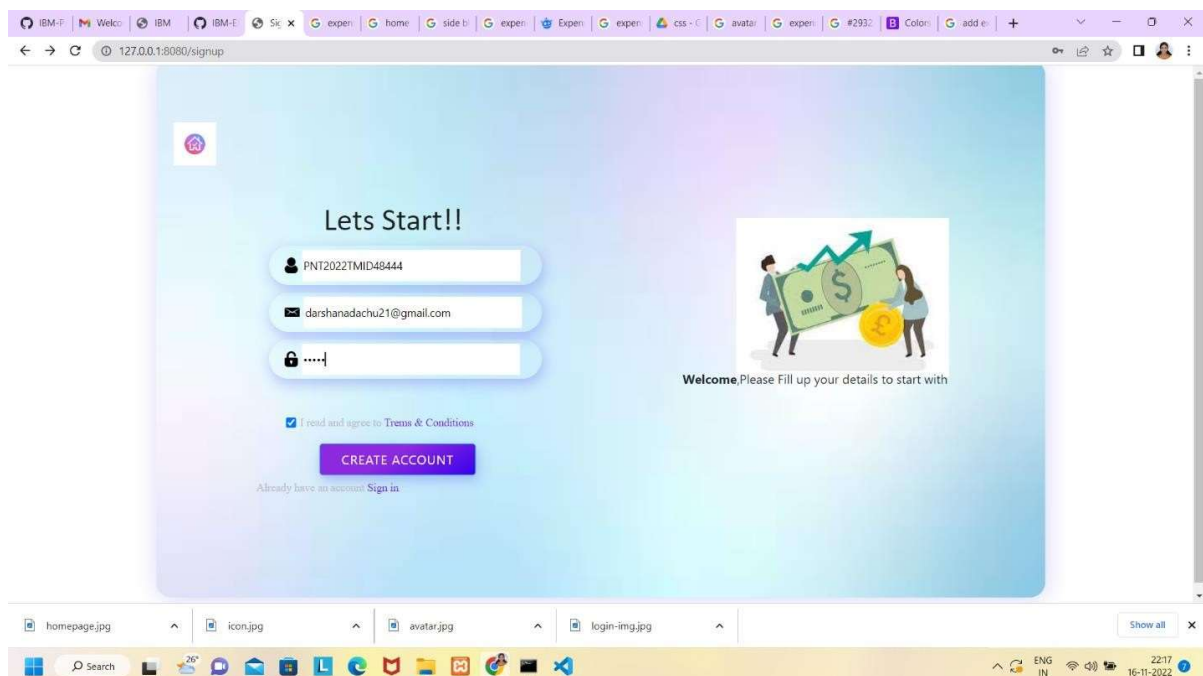

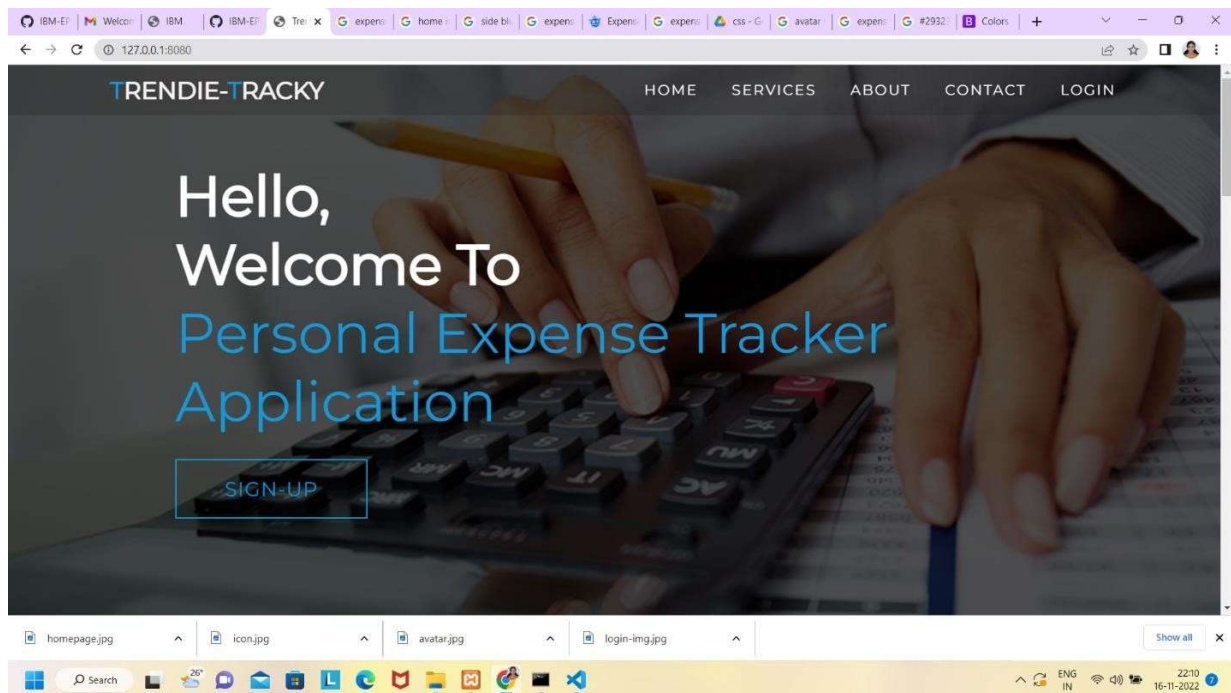

Sprint	Total Story Points	Duration	Sprint Start Date	Sprint End Date (Planned)	Story Points Completed (as on Planned End Date)	Sprint Release Date (Actual)
Sprint-1	20	6 Days	27 Oct 2022	01 Nov 2022	20	30 Oct 2022
Sprint-2	20	5 Days	02 Nov 2022	06 Nov 2022	20	07 Nov 2022
Sprint-3	20	5 Days	07 Nov 2022	11 Nov 2022	20	12 Nov 2022
Sprint-4	20	6 Days	12 Nov 2022	18 Nov 2022	20	19 Nov 2022

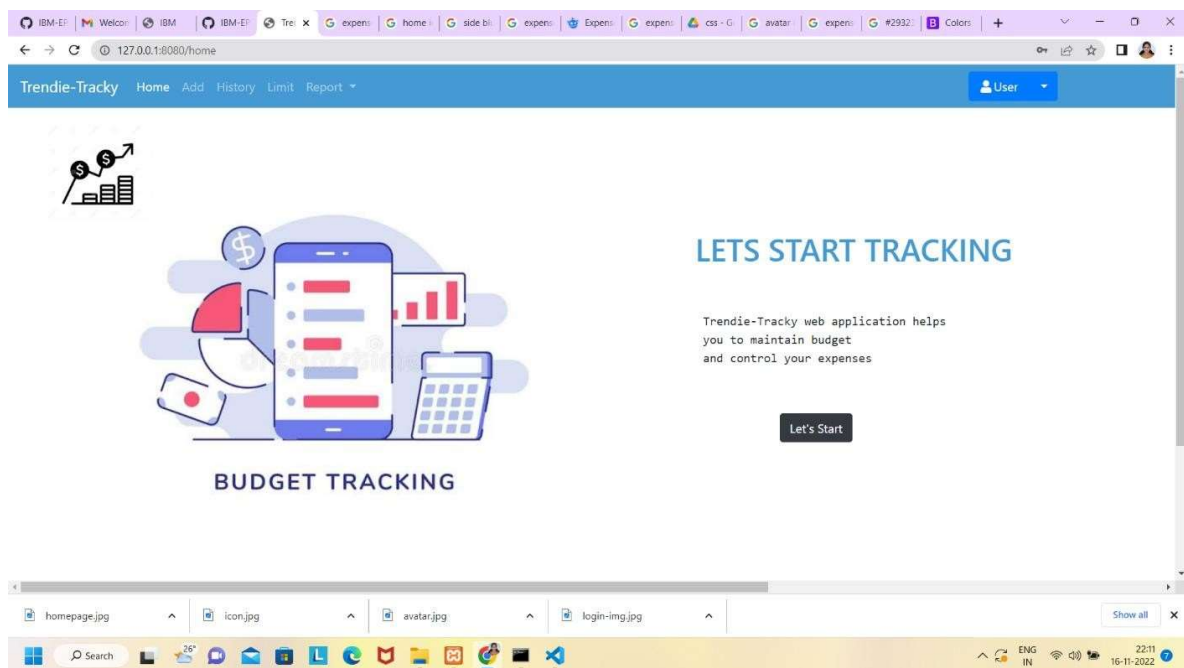

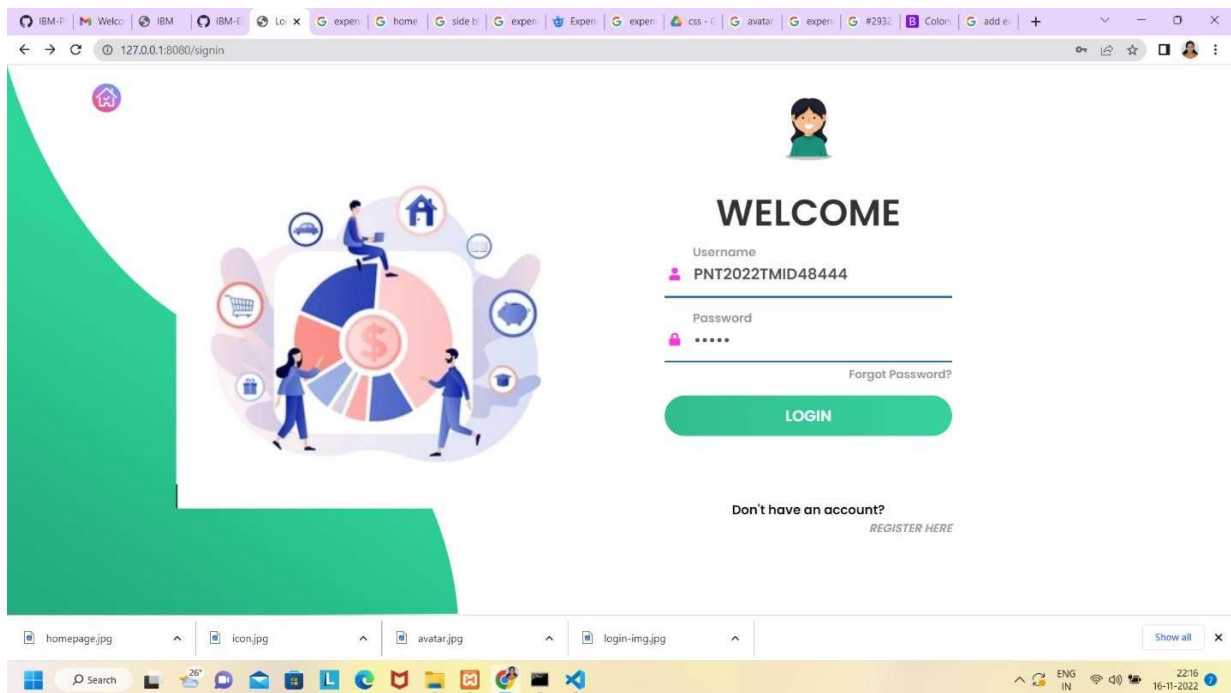

### Sprint Delivery Schedule

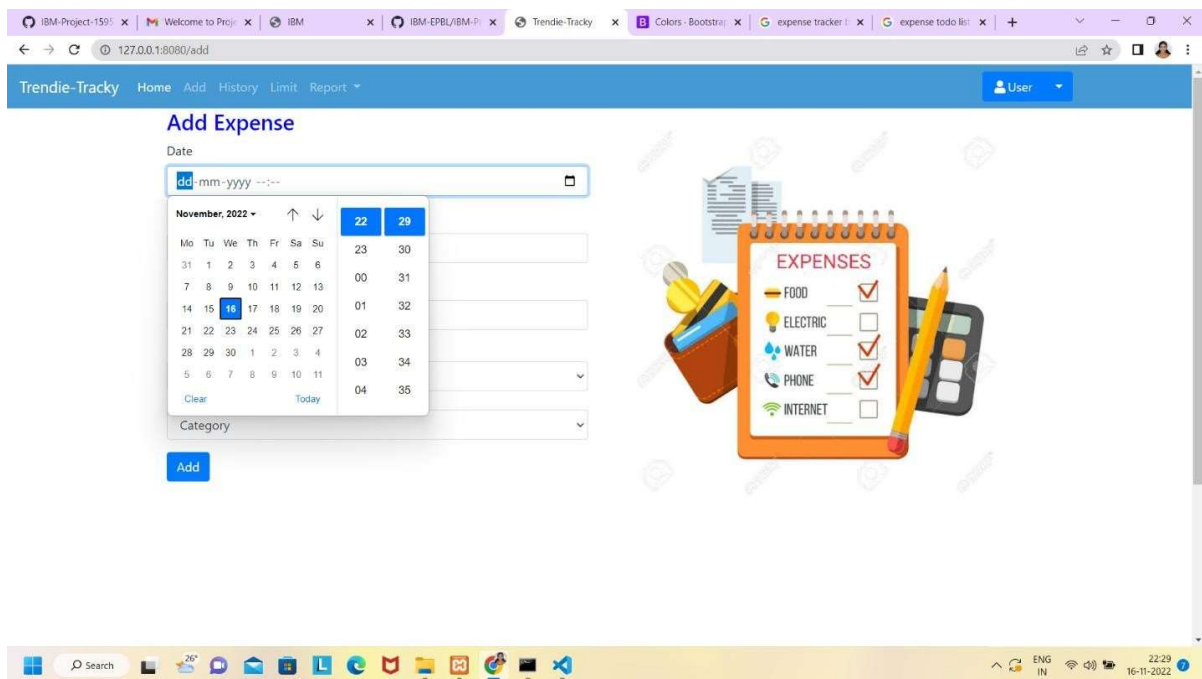

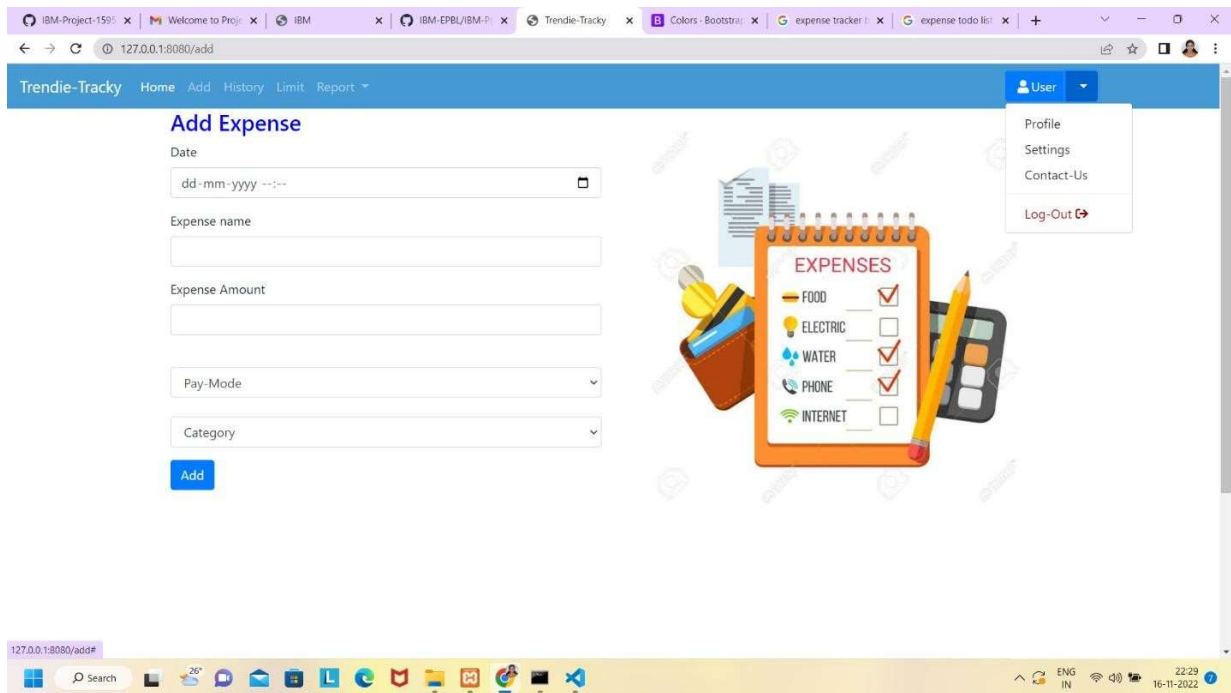

Velocity We have a 6-day sprint duration, and the velocity of the team is 20 (points per sprint). Calculating the team's average velocity (AV) per iteration unit (story points per day)

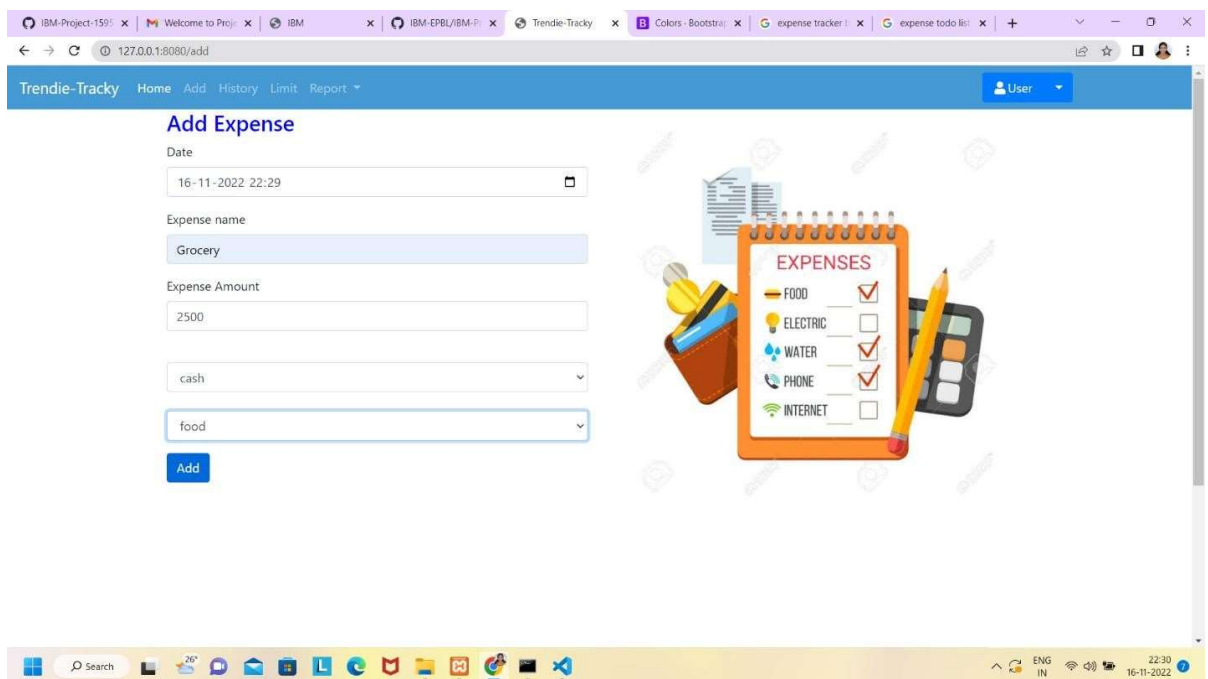

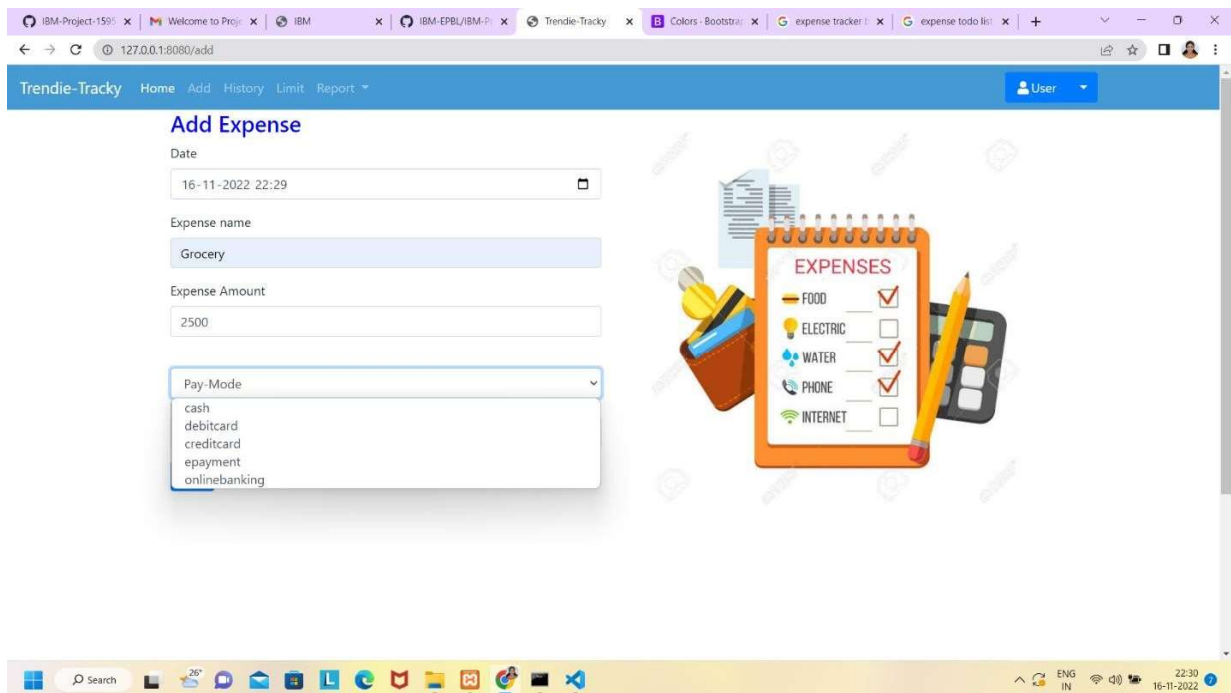

$$AV = \text{sprint duration/velocity} = 20/6 = 3.33$$

## 8.RESULTS

## **9. ADVANTAGES & DISADVANTAGES**

### **ADVANTAGES:**

- Easy Money management
- Reduce paper works
- Limitations in spending
- Manage unwanted spendings
- Well suitable for large organizations

### **DISADVANTAGES:**

- More dependent on mobile phones
- Initially difficult to understand for uneducated people

## **10. CONCLUSION**

By using this website one can know how much they spent and have a quality financial tracking, thus managing their expenses could be tracked more easily.

Managing and having a correct track of finance is essential in this scenario. But tracking it manually need time and effort, so with the help of such website the calculation will be much more easier also they have clear idea about where they have spent. With this method, they come to know about how much they spent on each activity.

Thus the user get to know their monthly, yearly and daily spendings in a graphical way which give them knowledge about their spendings and how they can minimize those spendings.

## **11. FUTURE SCOPE**

The Existing Expense tracker website or application have basic features like adding, updating and deleting income and expenses, setting up limit and showing graphical statistics (piechart, bargraph, etc..)

In future, we are planning to add barcode system as well as voice recognition so that the tracking could be more easier.

- The barcode system can be used for scanning the bills which has barcode so that the expense will be displayed.
- The voice recognition can be used as an easier source even for uneducated people to track the expenses so that they can add their expense through speech.
